SERIOUS ABOUT SECURITY

NEXT GENERATION SMART SECURITY

INTRODUCTION

One system, one smartphone app and a multitude of capabilities and features that empower you to own your smart security from start to finish.

Welcome to ERA Protect, the first security system of its kind to achieve the BSI IoT Security Kitemark, giving it the ultimate accreditation for security standards.

Accessible from anywhere in the world via a secure, encrypted server, the alarm and cameras work seamlessly together to provide round-the-clock monitoring and alerts, all stored to the cloud.

Wireless and app controlled, ERA Protect is adaptable to the environment it operates in. Add or remove additional accessories at any time, such as sensors and cameras, to make the system as big or as small as you need; perfect for people not necessarily rooted to one place.

With a massive array of back up and security features unique to ERA Protect, you can have confidence your smart security system is always working.

BSI INTERNET OF THINGS

What is BSI IoT Kitemark and why is it important?

IoT spans all kinds of smart devices; from mobile phones, coffee makers, washing machines to door locks, CCTV cameras and office lighting, to name but a few. The opportunities to positively impact our lives and businesses are endless, but the complexity of IoT makes it difficult to build trust in new products and services. While there are many benefits to the IoT, consider the following challenges:

Is it safe?

Will it work?

Will it work with everything else?

Is it secure?

...for as long as I need it?

This year it is estimated that over a quarter of identified attacks will involve IoT devices, as recent high-profile breaches have demonstrated the potential security risks to products ranging from smart watches to dolls.

Trusted in every way.

BSI have created a trusted framework to allow technology product manufacturers to stand up and be counted and prove their products can be trusted.

The IoT kitemark is there to shape, share, embed and support innovation along with the safe and reliable use of IoT applications and data and devices, reassuring consumers that their IoT enabled product or system is safe and secure. The BSI state of the art IoT laboratory enables them to address the increasing security concerns associated with connected devices. BSI also offers assurance for IoT functionality and interoperability through our BSI Kitemark scheme.

NEIGHBOURHOOD WATCH

ERA Protect is a Recommended Neighbourhood Watch product. This means it has confidently passed BSI Security standards and has been verified as a high security product range that would add benefit to any community to secure their properties. The Neighbourhood Watch branding can be seen as a sign of authentication on all packaging and forms part of a much larger range of Neighbourhood Watch Approved Security Products.

SAFE AND SECURE

ERA Protect has a multitude of security features that ensure it is a trusted product and offers the ultimate in security to give confidence to any user.

Made by security people, not gadget people

Trust in a system that has been developed by people who know security. ERA combine security expertise and knowledge with advancements in technology to provide you with the very best in smart security.

IoT Kitemark Status & recommended product

Certified to BSI IoT standards and recommended by the Neighbourhood Watch, provide trusted endorsements that support our innovative approach to producing next generation smart products.

Professional Monitoring

Enhance your alarm using our range of flexible professional monitoring packages. Let our team of experts keep an eye on your property, whether you're home or away.

Defending against an attack

Even cutting the alarm cables won't stop the system from sending out alerts if alarm is triggered, as the alarm hub contains a built in 4G SIM and backup battery. In addition, the 4G SIM will enable the cameras to send crucial data to the secure cloud storage. Power cables and data cables remain hidden, so an intruder will have less opportunity to vandalise or disable your cameras. Anti Tamper alerts mean you are alerted via your phone should someone try to remove the hub, siren or sensors from the walls.

Know that data is secure

With a GDPR compliant platform which boasts a UK ERA owned data server, we can ensure personal information and video is secure and never misused.

Encrypted code technology to protect wireless connection

Encrypted code protects transmission between the hub and sensors to ensure a secure system that doesn't overreact to outside interference.

Supported by UK development team

Never worry about support, as ERA Protect includes a UK helpdesk where advisors are on hand to assist with any system queries or concerns, via Phone, Email, Live Chat or Social Media.

SMART ALARM SYSTEM
ACCESS FROM ANYWHERE, ANYTIME

CLOUD BASED ETHERNET CONNECTION SMARTPHONE CONTROL

OUT OF SIGHT, BUT NEVER OUT OF ACTION.

Offering 24/7 monitoring with a unique difference, in the event of a broadband outage, the hub switches to the built-in 4G roaming back-up SIM, that is not affiliated with any network.

KEY BENEFITS

Dual path cloud based alarm system with over-the-air updates

Connects directly to your router, not dependent on WiFi signal

Embedded 4G roaming SIM back-up, automatically connects to strongest network signal*

App controlled from anywhere, anytime

Alarm and cameras can be controlled by a single app**

Upon alarm trigger, SIM card can relay images to the cloud from up to 4 cameras* even if internet connection is disabled
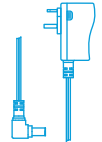

KIT CONTENTS

| 1 x Hub | 1 x PIR Motion Sensor | 1 x Door/Window Sensor | 2 x Remote Control | 1 x Power Supply |

✓ 1 x Ethernet Cable   ✓ 1 x Fixing Kit   ✓ 1 x Quick Start Guide

FEATURES

- **Access from anywhere.** Access alarm from anywhere with easy-to-use app, downloadable for IOS or Android Smartphones.

- **Always monitoring.** The Protect alarm will continue to protect the building, monitor and notify a user even if in event that the internet fails.

- **Built in protection.** A built-in SIM will allow the user to control the system, whilst maintaining all functionality including data transfer to the cloud.

- **Hassle free communicating.** The 4G roaming SIM will pick up the best signal to communicate so no need to choose specific provider. Full SIM functionality is available by simply activating the subscription via the app.

- **Easy Control.** Arm, homearm or disarm with an easy to use app, remote control or keypad. All settings can be viewed and adjusted with quick slide.

WIRELESS SIREN
BATTERY OPERATED SIREN

LONG LIFE BATTERY

104 DB SIREN

TWO WAY WIRELESS

VISUAL DETERRENT AND ALERT

The battery operated wireless siren connects easily via the app to the alarm hub and alerts neighbours and passers by with a 104dB siren in the event the alarm is triggered.

KEY BENEFITS

LED flashing comfort light to deter would-be intruders 24/7

Strobe lights flash during a triggered alarm state to attract attention

Loud 104dB siren with adjustable duration to alert neighbours

Tamper protected – alarm will sound if removed

Wireless connection to alarm hub

Long life battery to reduce maintenance

KIT CONTENTS

ERA

1 x Siren

✓ 1 x Fixing Kit

✓ 1 x Installation and Operating Manual

✓ Batteries

FEATURES

○ **Strong Deterrent**. Bright coloured siren, that has comfort flashing lights to show it is in operation, acts as a clear deterrent to potential intruders.

○ **Easy Installation.** The Protect Siren is easy to install. You can install the back plate and then clip the front panel onto the back plate.

○ **Connect within seconds.** Easy to connect to the main Protect Alarm System alongside additional sirens if required to cover other sides of property.

○ **Anti Tamper as standard.** If the siren is removed from the wall or surface, the siren will sound and the user will be notified through the smartphone.

○ **No wiring.** Long-life battery operated siren that ensures no complicated wiring is required.

CLOUD BASED

1080
1080P HD CAMERA

SMARTPHONE CONTROL

OUTDOOR CAMERA THAT STANDS OUT FROM THE CROWD

A visual deterrent as well as recording audio and HD quality video. View activity logs or live feed on your smartphone and record to the cloud via the alarm SIM should your internet fail.

KEY BENEFITS

Works with your smartphone via WiFi or ethernet

Live view capability day or night via 1080p HD video

PIR to detect motion and trigger recording

Video cloud recording and activity logs to review motion events

Cables protected against weather damage or tampering

Can be used as standalone or with ERA Protect alarm and cameras

IP66 "dust tight" and protected against heavy seas or powerful jets of water

* ERA Plus subscription required
** Cameras available separately

KIT CONTENTS

1x Outdoor Camera

1x Aerial

✓ 1 x Connector
✓ 1 x Power Supply
✓ 1 x Drilling Template
✓ 1 x Quick Set Guide
✓ 1 x Fixing Kit
✓ 1 x Window Sticker

FEATURES

○ **Secure as can be**. With protected power wiring to guard against vandals and weather, your camera can be relied on for 24hr protection.

Encrypted. 128 bit SSL security, your clips will be safely stored for 30 days*
*With ERA subscription.

Improved detection. PIR motion detection reduces false alerts.

○ **Easy to use.** ERA Outdoor Camera can be accessed via smartphone and can be operated as standalone or as part of a full security system of alarm and additional cameras.

○ **Weatherproof**. This robust Outdoor Security Camera is weatherproof to IP66 international standards and is perfect for watching driveways, observing gardens and outbuildings. Complete with a fitted sun shield to deflect heat away from the Camera, you can keep a watchful eye over your property come rain or shine.
