

Snaplock for PVCu Windows

Features

- The PVCu Snaplock increases the security on PVCu windows
- Combines lock and handle into one unit
- Takes its name from the simple operation that allows it to 'snap' into place and 'lock' quickly and easily
- No fitting jig required - the Snaplock screws into existing installations and supplements the locking devices that are already in place
- Can be fitted to either open in or open out windows; and can be fixed to reinforced and non-reinforced sections
- Can also be used to upgrade security on PVCu doors
- Keyed and keyless versions available
- Over 100 key variations for the keyed version

Keyless Snaplock

Keyed Snaplock
